

## CEFA AVIATION AND GE AVIATION PARTNER IN FLIGHT ANALYSIS AND ANIMATION

HIGH FIDELITY DATA ENABLES EFFICIENT, PRECISE ANIMATIONS FOR PILOTS

Colmar, February 27<sup>th</sup>, 2018

CEFA Aviation and GE Aviation have formed a partnership to provide customers with a higher fidelity of data for airline flight safety analysis, operational efficiency and pilot training. The partnership combines GE's experience in flight analytics with CEFA Aviation's expertise in flight data animation.

"CEFA Aviation's expertise in flight animation brings a much-needed capability to our existing and new flight data analysis customers," said John Mansfield, chief digital officer for GE Aviation. "This partnership will allow customers to achieve more precise visualization when we apply a greater level of cooperation between our organizations."

The partnership was announced this week at [GE Aviation's Waypoint event](#).

"We are glad to develop a win-win partnership with a major player in aviation in order to convince more and more airlines to use flight animation and thus, contributing to make the sky safer," emphasizes Dominique Mineo, CEO and founder of CEFA Aviation.

The high quality, native outputs of GE's flight analytics allow customers to gain a unique and powerful perspective on their operations. Utilizing flight animations with GE's flight data analysis will enable more efficient and precise creation of high-quality animations for determining root causes of operational issues and communicating operational and training issues to pilots.

## About us

---

**CEFA Aviation**, a privately-held French company, enhances pilot training and flight safety by developing world-leading 3D animation software and services since 18 years. The innovative solutions developed by its experts recreate flights with high detail and accuracy based on data from aircraft flight recorders.

More than 80 major and regional airlines, cargo operators and investigative authorities on five continents are using the core software of the company, CEFA FAS (Flight Animation System) for pilot training and safety analysis.

Translating flight data into precise visualization requires in-depth understanding of the complexity of aircraft systems and software engineering. CEFA Aviation has been a pioneer in easy-to-use flight data animation since Dominique Mineo founded the company in 2000. Its long-lasting success is attributable to a passion for aviation and innovation, listening to its clients, and delivering gold-standard support. The CEFA Aviation team is headquartered in the Alsace region of France.

At the Dubai Airshow, CEFA Aviation unveiled a new breakthrough visualization tool to further enhance and personalize pilot training.

**GE Aviation**, an operating unit of General Electric Company (NYSE: GE), is a world-leading provider of commercial and military jet engines, and avionics, digital solutions and electrical power systems for aircraft. GE is the world's Digital Industrial Company, transforming industry with software-defined machines and solutions that are connected, responsive and predictive. With people, services, technology and scale, GE delivers better outcomes for customers by speaking the language of industry.
