CEFA is one of the most trusted source of flight animation for:

- Pilot Training
- FOQA/FDM event validation and investigation
- Accident/incident investigation
- SOP, RNP approach, airport familiarization and CRM
- Flight path and fuel consumption optimization
- Simulator data import for brief/debrief and replay

*Advanced and powerful CEFA is one of the most feature rich, easy to use, flight animation software available*

More than CSV we support :

- Raw binary data: **FDR, QAR** and **DAR**
- **Video** and **Audio** import
- 3rd party **FDM** systems integration
- **Events** displayed right in the animation
- High resolution terrain included
- Audio warnings and engine sounds
- Turbulence recreation
- Animated hand shows sequence actions
- Interactive cockpit
- Secondary system pages
- Nav charts
- **TCAS** data
- **METAR** data
- 3D object import
- Video export
- **Tablet** and **Mobile** enabled

*Bring your flight data to life*
