

## TO CONSTANTLY STRENGTHEN FLIGHT SAFETY, EMIRATES SELECTS CEFA AVIATION'S FLIGHT DATA ANIMATION SOFTWARE

---

Emirates continues to enhance flight safety monitoring by choosing [CEFA FAS](#), to visualize flights using extensive flight data to improve on flight safety standards and to create animations for flight crew training purposes.

Colmar, 30<sup>th</sup> September 2020

“Safety is integral to Emirates’ core values and the cornerstone of all of our operations and practices. Our vision is to be the safest airline in the world for which Emirates will utilize the best tools available in the market,” states Capt Hassan Alhammadi, Divisional senior vice president of Flight Operations.

“Since its beginning Emirates has traced a path pursuing high quality and industry-leading services. Today we are proud to know that Emirates has chosen CEFA FAS, proof that we meet the market’s high standards and allowing CEFA Aviation to continue to expand its presence in the middle east,” explains [Dominique Mineo](#), CEO and founder of CEFA Aviation.

CEFA FAS animation software can process a variety of complex forms of recorded flight data and information and display it dynamically and synthetically in a form that can be understood and shared by a wide audience within the aviation industry.

With the addition of CEFA FAS as an operational digital and technological tool, Emirates demonstrates its eagerness for continuous improvement.

### About us

---

**CEFA Aviation**, a privately held French company, enhances pilot training and flight safety, developing world-leading 3D animation software and services for the past 20 years. The innovative solutions developed by its experts recreate flights with high detail and accuracy based on data from aircraft flight recorders.

About 100 major and regional airlines, cargo operators, and investigative authorities on five continents are using the core software of the company, CEFA FAS (Flight Animation System) for pilot training and safety analysis. Translating flight data into precise visualization requires an in-depth understanding of the complexity of aircraft systems and software engineering. CEFA Aviation has been a pioneer in easy-to-use flight data animation since Dominique Mineo founded the company in 2000. Its long-lasting success is attributable to a passion for aviation and innovation, listening to its clients, and delivering gold-standard support. The CEFA Aviation is headquartered in the Alsace region of France.
