

TURKISH AIRLINES SIGNS FLIGHT DATA ANIMATION PARTNERSHIP WITH CEFA AVIATION

TURKEY'S NATIONAL FLAG CARRIER WILL REINFORCE FLIGHT SAFETY WITH DETAILED AND ACCURATE VISUALIZATIONS FROM CEFA FAS.

Colmar, September 21st, 2021

For the airline flying to most countries in the world, safety is considered an indispensable asset, and its management is committed to it. [CEFA FAS'](#) animations will serve [Turkish Airlines'](#) Safety Management team to understand better and monitor potential risks.

"Turkish Airlines continuously strives to achieve the highest possible safety standards. We are confident that CEFA FAS will help our Flight Safety Department manage operational issues and address future challenges", said Captain Mehmet Nuri TİMURTAŞ, SVP, Corporate Safety.

Dominique Mineo, CEO and founder of [CEFA Aviation](#), shared: *"We are delighted with this partnership and to know that the animations created with our solution will help Turkish Airline's Flight Safety Team to continue to achieve the highest safety standards."*

[CEFA FAS](#) animations provide flight investigators with realistic visual and auditory elements to go beyond a purely mathematical FDM analysis. Reproducing the dynamics gives a concrete notion of time to each sequence of events and leads to a better understanding of performances. Its ease of use allows flight data analysts to have an excellent resource for communication and risk awareness among crews.

"Prevention is the most cost-efficient way to improve flight safety. In addition of being very useful for investigation, CEFA FAS will enable us to develop learning materials for pilots based on real facts from our airline", said Cumhur KILINÇ, Turkish Airlines, Safety Information Manager.

Xavier Colognac, CEFA Aviation VP Sales, commented: *"We are thrilled to have such a renowned company as Turkish Airlines as a new customer. Over the years, CEFA FAS software has become essential for any airline wishing to reach flight safety excellence."*

About CEFA Aviation

[CEFA Aviation](#), a privately held French company, enhances pilot training and flight safety, developing world-leading 3D animation software and services for the past 20 years. The innovative solutions developed by its experts recreate flights with high details and accuracy based on data from aircraft flight recorders.

More than 90 major and regional airlines, cargo operators, and investigative authorities on five continents use the company's core software, CEFA FAS ([Flight Animation System](#)) for pilot training and safety analysis.

Translating flight data into precise visualization requires an in-depth understanding of aircraft systems and software engineering complexity. CEFA Aviation has been a pioneer in easy-to-use flight data animation since Dominique Mineo founded the company in 2000. Its long-lasting success is attributable to a passion for aviation and innovation, listening to its clients, and delivering gold-standard support. The CEFA Aviation is headquartered in the Alsace region of France.

At the Dubai Airshow 2017, CEFA Aviation unveiled a breakthrough visualization tool to enhance further and personalize pilot training: [CEFA AMS](#). Additional information can be found at www.cefa-aviation.com/

About Turkish Airlines

[Turkish Airlines](#) serves more destinations non-stop from a single airport than any other airline in the world, and flies to 126 countries, more than any other airline.

About Turkish Airlines: Starting on May 20, 1933 with five planes, Star Alliance member, Turkish Airlines is an airline company that flies to more than 300 destinations in the world with a fleet of more than 300 (passenger and cargo) aircraft.
