

Vueling signs up with flight data animation company CEFA Aviation

Vueling has chosen the leading flight visualization software CEFA FAS to meet their flight safety needs and enhance pilot training.

Colmar - France, November 30, 2021

Spain's full-service carrier continues to invest in its capability to ensure safe operations. [CEFA FAS](#) will allow the airline's flight safety department to easily translate aircraft data into meaningful animation to analyze flights better.

"Safety is naturally considered to be an absolute priority at [Vueling](#). We are confident that by choosing CEFA FAS software, we have taken a big step to ensure we remain safe while continuing to develop our network," said [Captain Manuel Ortega](#), Head of Safety.

Over the years, CEFA FAS software has become a must to any airline wanting to improve Safety. Among its many benefits, it supports crews to gain better familiarity with terrains. Especially in these critical times of reduced flying activity and skills erosion, flight animations produced by CEFA FAS can help mitigate unstable approaches at hotspots identified through FDM.

[Dominique Mineo](#), CEO and founder of [CEFA Aviation](#), declared: "We are very proud that Vueling has placed its trust in us. We are delighted to work with such a major airline in Spain who chose our solution to enhance its flight safety".

Vueling joins a long list of operators who have chosen to complement their FDM/FOQA program with CEFA Aviation's advanced flight animation software.

About CEFA Aviation

[CEFA Aviation](#), a privately held French company, enhances pilot training and flight safety, developing world-leading 3D animation software and services for the past 20 years. The innovative solutions developed by its experts recreate flights with high details and accuracy based on data from aircraft flight recorders.

More than 100 major and regional airlines, cargo operators, and investigative authorities on five continents use the company's core software, CEFA FAS ([Flight Animation System](#)) for pilot training and safety analysis.

Translating flight data into precise visualization requires an in-depth understanding of aircraft systems and software engineering complexity. CEFA Aviation has been a pioneer in easy-to-use flight data animation since Dominique Mineo founded the company in 2000. Its long-lasting success is attributable to a passion for aviation and innovation, listening to its clients, and delivering gold-standard support. The CEFA Aviation is headquartered in the Alsace region of France. At the Dubai Airshow 2017, CEFA Aviation unveiled a breakthrough visualization tool to enhance further and personalize pilot training: [CEFA AMS](#).
