

Press Release

Air Premia to implement CEFA Aviation's flight data animation software

COLMAR, France & SEOUL, South Korea – February 1, 2022

South Korea's first "hybrid service carrier," focusing on medium and long-haul routes, has chosen [CEFA FAS](#) (Flight Animation System) for its Boeing 787 fleet animation.

CEFA FAS is an animation and analysis software that recreates flights using FDR/QAR data. It provides a detailed insight into flight operations in a form understandable to investigators and pilots.

Myeongseob Yoo, CEO of [Air Premia](#), says: "As a new entrant, we are convinced that flight safety will contribute to our company's success. As a priority, we decided to equip our Safety Division with [CEFA Aviation](#) visualization software from the beginning. We are confident in this choice to help us ensure safe and efficient operations."

Air Premia joins a large community of airline customers who have chosen to enhance flight data analysis using CEFA FAS animation software combined with in-depth industry knowledge.

"We are delighted to partner with this new start-up airline, which gives itself the means of achieving the highest safety standards from the launch of its operations," says [Dominique Mineo](#), CEO and founder of CEFA Aviation.

About CEFA Aviation

[CEFA Aviation](#), a privately held French company, enhances pilot training and flight safety, developing world-leading 3D animation software and services for the past 20 years. The innovative solutions developed by its experts recreate flights with high details and accuracy based on data from aircraft flight recorders.

More than 100 major and regional airlines, cargo operators, and investigative authorities on five continents use the company's core software, CEFA FAS ([Flight Animation System](#)) for pilot training and safety analysis.

Translating flight data into precise visualization requires an in-depth understanding of aircraft systems and software engineering complexity. CEFA Aviation has been a pioneer in easy-to-use flight data animation since Dominique Mineo founded the company in 2000. Its long-lasting success is attributable to a passion for aviation and innovation, listening to its clients, and delivering gold-standard support. The CEFA Aviation is headquartered in the Alsace region of France.

At the Dubai Airshow 2017, CEFA Aviation unveiled a breakthrough visualization tool to enhance further and personalize pilot training: [CEFA AMS](#). Additional information can be found at www.cefa-aviation.com/
